Makassar, South Sulawesi

Hi, I'm M. Fikri Haikal Ayatullah.

Informatics Engineering · Web Developer · Data Analysis · Office Administration · Finance · NLP · Data Science

Informatics Engineering graduate, specializing in web development, with hands-on experience in building responsive web applications using HTML, CSS, JavaScript, TypeScript, Node.js, SQL, Python, and Next.js. Experienced in full-stack web development, including front-end interface development, back-end implementation, database integration, and functional testing. Also equipped with practical skills in data processing, data analysis, data science, and AI, supported by experience in government data processing and administrative workflows. Detail-oriented, adaptable, and committed to developing reliable and user-focused technology solutions.

Education

2022 – 2026

Bachelor of Informatics Engineering — GPA 3.73 / 4.00

Muhammadiyah University of Makassar

01

Full-Stack Web Development

Responsive web applications with Next.js, React, TypeScript, Node.js, PHP, and SQL — from design through functional testing.

02

Data Engineering & Analytics

Data collection, cleansing, analysis, and insight generation with Python, SQL, and PostgreSQL.

03

Administration & Finance

Government data processing, document management, archiving, and finance workflows with Microsoft Office.

04

NLP, AI & Data Science

Natural language processing, machine learning, and deep learning applied to real-world decisions.

PROJECTS

Projects I have worked on

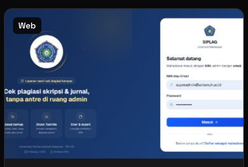

A collection of web applications and data analysis work, from institutional information systems to machine learning models.

NAVI-MU — Smart Indoor Wayfinding

Indoor navigation system for RSIA Sitti Khadijah Muhammadiyah Makassar: real-time room map, cross-floor navigation, and 2D/3D modes for patients, families, and staff.

Next.js · TypeScript · UI/UX · Interactive Map

SIPLAG — Campus Plagiarism Checker

Official plagiarism-check service for theses and journals at Unismuh Makassar with a transparent queue, Turnitin integration, and automatic scores and reports.

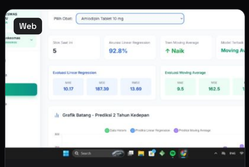

Web App · Authentication · Dashboard · UI/UX

SIKEU — Financial Information System

Finance management application for recording transactions, recaps, and reporting, replacing manual Excel-based bookkeeping.

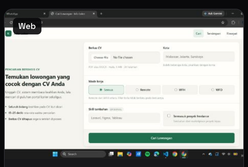

Web App · Finance · Reporting · CRUD

Health Centre Drug Stock Forecasting

Drug stock demand forecasting dashboard for UPT Puskesmas Sukamaju using Linear Regression and Moving Average models, complete with MAE/MSE/RMSE evaluation and a 2-year projection.

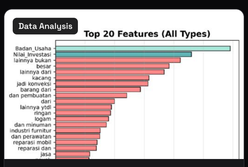

Machine Learning · Python · Dashboard · Forecasting

Info Loker — CV-Based Job Search

Upload a CV and the system automatically extracts skills, then matches them against job listings from dozens of career portals at once, with city and work-mode filters.

Python · NLP · Web Scraping · Web App

Data Exploration & Visualization

Exploratory data analysis to uncover patterns and insights, visualized in charts that are easy for stakeholders to understand.

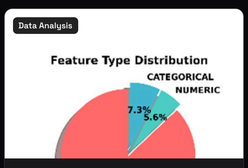

Python · Pandas · Matplotlib · EDA

SME Business Category Classification

Multi-class classification model (Processed Food, Vehicle Repair, Bakery & Pastry, Textiles & Apparel) with 96.7% balanced accuracy, evaluated via confusion matrix.

Machine Learning · Scikit-learn · Classification · Model Evaluation

Dataset Feature Type Profiling

Analysis of feature type distribution (text, categorical, numeric) as the basis for preprocessing and feature engineering strategy.

Python · Preprocessing · Feature Engineering

EXPERIENCE

Work experience

Professional journey and the roles I have taken on.

2026 · 4 MONTHS

Fullstack Developer

Unismuh Makassar Primary School

- Developed a school finance web interface using HTML, CSS, JavaScript, Node.js, SQL, Python, TypeScript, and Next.js in accordance with project and user requirements.
- Implemented front-end and back-end components and website layouts, from the initial design stage through to functional testing.
- Carried out comprehensive testing of the website's functionality to ensure interface features operate according to project requirements.

2026 · 4 MONTHS

Fullstack Developer

Bontomangape Community Health Centre, Galesong Sub-district, Takalar Regency

- Developed responsive web interfaces using HTML, CSS, JavaScript, Node.js, SQL, Python, and TypeScript based on project and user requirements.
- Implemented front-end and back-end components and website layouts from initial design through functional testing.
- Conducted comprehensive testing of website functionality to ensure interface features operated according to project requirements.

2025 · 2 MONTHS

Data Science

South Sulawesi Department of Industry and Trade

- Conducted analysis on trends in the small and medium-sized enterprise (SME) sector.
- Processed raw data relating to the SME sector in Makassar, from data collection through to data cleansing.
- Utilised deep learning to process data and provide insights to inform the agency's policy decisions.

2025 · 3 MONTHS

Intern

South Sulawesi Department of Industry and Trade

- Processed and managed domestic trade data to support administrative operations within the department.
- Conducted Microsoft Excel training sessions for department staff to improve data processing workflows.
- Supported administrative data management through accurate processing and organization of departmental information.

ORGANIZATIONS

Organizational experience

Leadership and community involvement outside the workplace.

2023

Member

Darul Arqam Foundation — Muhammadiyah University of Makassar

2018

Secretary for Cadre Affairs

Muhammadiyah Students' Association

- Coordinated activities relating to the recruitment and training of members of the Muhammadiyah Students' Association.

CERTIFICATIONS

Certificates & training

Proof of competence in networking, cybersecurity, databases, and other professional training.

2026

MikroTik Certified Network Associate (MTCNA)

MikroTik — No. 2604NA5986

2025

Cybersecurity Essentials

Cisco Networking Academy · Muhammadiyah University of Makassar

2025

Certificate — Department of Industry and Trade

South Sulawesi Department of Industry and Trade

2024

Oracle Database Programming with SQL

Oracle Academy

2025

Morning Class Collaboration Program — Research & Networked Innovation

Faculty of Engineering, Unismuh Makassar × University of Kelantan, Malaysia

SKILLS

Skills & technologies

Grouped by the areas I focus on.

01

Coding & Development

Building responsive, full-stack web applications from interface design through functional testing.

- HTML
- CSS
- JavaScript
- TypeScript
- PHP
- Next.js
- React
- Node.js
- Java
- UI/UX Design

02

Data Engineering & Analytics

Turning raw data into insights with databases, machine learning, and natural language processing.

- Python
- SQL
- PostgreSQL
- Natural Language Processing
- Artificial Intelligence
- Machine Learning
- Deep Learning

03

Administration & Digital

Accurate data processing and well-organized administrative and finance workflows.

- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Data Processing & Analysis
- Document Management
- Archiving
- Finance

04

Soft Skills

Working effectively with people and delivering reliable results.

- Public Speaking
- Leadership
- Cross-Functional Teamwork
- Time Management
- Critical Thinking
- Problem Solving
